Skills

- Front-End: HTML5, CSS3, JavaScript, React (Basic)
- CMS: WordPress, Elementor
- Hardware & Low-Level: C Programming, Microcontrollers (AVR, ARM)
- Tools & Platforms: Git, GitHub, Canva
- Languages: English (Professional), French (Basic)

Creative and detail-oriented Web Developer with a strong foundation in front-end technologies including HTML, CSS, JavaScript, and WordPress. Passionate about turning complex ideas into beautiful, user-friendly websites. Eager to leverage technical skills to build engaging online experiences.

Experience

Freelance Web Developer & Project Work | 2022 - Present

- Gained practical experience by designing and developing 3 complete websites for a client, handling the process from concept to a functional front-end product.
- Independently built several small-scale projects using React to explore modern front-end frameworks.
- Expanded technical knowledge by studying back-end technologies, including Node.js

Technical Studies & Foundational Skills | 2019 - 2022

- Completed a comprehensive web development course covering HTML, CSS, JavaScript, and Responsive Design principles.
- Developed a strong, low-level understanding of programming and electronics through certified courses in C Programming and Microcontrollers (AVR, ARM) at Mojtama Fanni Tehran

Education

Bachelor of Science in Biomedical Engineering

- Islamic Azad University, Science and Research Branch - 2019
